**Delany Technology Achieves Microsoft Unified Communications Competency Voice Specialization**

**Delany Technology is a company with more than 15 years of experience in telecommunications and IT. As a Microsoft Certified Partner who has achieved Voice specialization, Delany offers complete unified communications solutions for mid-size and large companies. Delany's solutions improve productivity and business value through end-to-end deployments using Microsoft best and proven practices.**

[Ciudad Autonoma de Buenos Aires, Buenos Aires - Argentina] — November, 2008 — Today, **Delany Technology**, announced that through the Microsoft Partner Program they have fulfilled the qualifications necessary to achieve Voice specialization within the Microsoft Unified Communications competency.

Earning the Unified Communications competency Voice specialization requires the completion of competency testing and a rigorous technical readiness program that includes specific staffing requirements and an internal deployment of the complete Microsoft unified communications offering. Companies who achieve the Unified Communications competency Voice specialization are qualified by Microsoft to deploy Microsoft unified communications technologies such as Microsoft Exchange Unified Messaging and Microsoft Office Communications Server 2007, including VoIP and audio-, video-, and Web-conferencing.

“Delany Technology provides enterprise organizations with cutting edge technology using unified communications solutions” said Andrés Gorzelany, VP IT Consulting, Delany Technology. “As a Microsoft Certified Partner who has achieved the Unified Communications competency Voice specialization, our customers are assured they are hiring a qualified vendor to deploy Microsoft’s latest unified communications voice technologies.”

“Companies such as Delany Technology that have achieved Voice specialization are trained to understand the potential that exists in Microsoft’s software powered voice technologies,” said Swift. Senior Director of product management for the Unified Communications Group at Microsoft Corp. “In this way they can offer solutions in and outside the realm of traditional telephony, including working with their customers to create more productive business processes through unified communications.”
